WordRocket — LIVE
- Improved the database interface for better usability.
- Developed SEO templates for marketers and writers.
- Built and integrated REST APIs to boost user functionality.
- Automated content generation with AI for better efficiency.

Experience

Full Stack Developer
Eirene Cremations • Regina, Saskatchewan, Canada (Remote) — MAR 2023 - APR 2024

At Eirene Cremations, I focused on delivering features such as a deceased status checker and creating forms for listing deceased information. I also built internal tools to manage the entire system, create and integrate backend APIs & collaborated with the team to ensure a seamless user experience.

Full Stack Developer
Spontivly • St Petersburg, Florida, United States (Remote) — JUN 2022 - FEB 2023

At Spontivly, I developed and maintained web applications as a team member. I created a library content management system with user-friendly features and implemented a complex search filter for refining content. I also designed the UI/UX, fixed bugs, and deployed the application to production.
